The *glasgowtheme* is a Beamer theme with minimal visual noise inspired by the HSRM Beamer Theme by Benjamin Weiss, and the mtheme Beamer theme by Matthias Vogelgesang.

Enable the theme by loading

```
\documentclass{beamer}  
\usetheme{glasgow}
```

The theme requires XeLaTeX in order to compile, because of the Fira Sans fonts it uses; these should be included in the **texlive-fonts-extra** package on Linux.

Sections group slides of the same topic

```
\section{Elements}
```

for which the *mtheme* provides a nice progress indicator ...

## ELEMENTS

---

The theme provides sensible defaults to `\emph{emphasize}` text, `\alert{accent}` parts or show `\textbf{bold}` results.
